

pyportfolios.com — Progress Update

Prepared by Harsha & Bhavya for Louis Chakkalakala · 5 June 2026

Live preview: <http://103.99.38.239:1133> (open in an Incognito window for the latest)

1. Your feedback — addressed

You asked for	What we did	Status
Library logos to match the brand deck (slide 12)	All 10 libraries taken straight from the deck — scikit-learn, PyTorch, TensorFlow, Keras, Zipline, vectorbt, QuantLib, Riskfolio-Lib, Pyfolio, Alphalens — on clean white chips	Done
Exchange logos to match the brand deck (slide 13)	All 21 exchanges from the deck (Americas / Europe / Asia & Australia). Removed incorrect logos that were not exchanges; ASX now included	Done
The map (slide 14)	The exact "top-15 economies" map (developed & emerging) in the Geographies section	Done
Footer to follow the Framer site	Full-bleed mountain photo call-to-action ("Step up the game / Find your edge") above the footer	Done
Hero image across the whole screen	Hero photograph is now full-bleed, edge-to-edge (was previously boxed in the middle)	Done
Three "Our Focus" photos	Slots are ready and waiting — pending the three images from you	Pending (you)

2. Additional improvements made

- **Logos refined** — sourced exactly from the brand deck, enlarged, tightly cropped, and arranged as a compact, uniform grid.
- **Navigation** — added Course and Literature to the top menu; brightened all menu headings for readability.
- **Readability** — lifted the faint caption / metadata text (lesson minutes, counts, captions, fine print) across every page.
- **Smooth scrolling** — added a refined "glide" scroll effect site-wide.
- **Version options** — all design versions remain browsable on the page so you can choose your preferred direction.

3. Pending from your side

- The **three "Our Focus" photographs** for the landing page.
- A **preferred design version** (V0–V11) — happy to choose together on the call.

4. For this call — decisions we would like

1. Confirm the **logos, map, hero and footer** meet expectations.
2. Pick the **design version** to move forward with.
3. Agree the **next milestone / scope**.

Note on the preview link: please open it in a private / incognito window, as normal browsers cache older versions of static sites and may show out-of-date content.
